

Case Study: Multi-System Migration to ENOVIA PLM

Industrial Equipment Manufacturer for Mining & Cement Plants

Business Challenges

-  Heterogeneous design applications across multiple sites
-  Lack of Engineering Data integrity
-  Unstructured Design Data Management

Our Solution

-  Integrated flight records using Mateos™ Systems Migration & integration platform
-  Aircraft Snag analysis on Falcon™ Analytics platform
-  On-click Pattern detection Robust Prediction Models

Business Impact

-  99% reduction in manual data extraction & analysis
-  **6 Days** Saved per analysis
-  Machine Learning Auto Generated Add-On Models
-  **96%** Data Accuracy
